Assignment 6-1: Strings Analysis

New Attempt

Due May 23 by 11:59pm   **Points** 5   **Submitting** a text entry box or a file upload
Available May 14 at 12am - Jun 6 at 11:59pm 24 days

Description:

To submit your assignment:

- Use the +Submit Assignment link located in the top right corner.
- Type your submission or find and upload your saved file.
- Click the Submit Assignment button to turn in your assignment.

You will run a basic strings analysis on a program to gain sensitive information from it.
Such a activity gives great insight into the dangers for companies to hard-code secrets into programs.
Additionally this activity doubles as a quick and dirty way to do forensic analysis on a file.

Download the homework folder from here:
Please note it is highly recommended that you do this in the virtual environment. If you would like to do this offline you may have to recompile the source code of the assignments to work for your personal VM.
Download homework file ↓

Or in the UW virtual environment it can be reached at:
